---

Carrie,

We expect the initial sampling results to be in this week. We will use these sediment results to pick the fish/crab analyte list, and once the fish/crab sampling plans are ready, do the fish/crab sampling in a month or two. These samples will be for human exposures. Would you like to see these sampling results? I would be interested in your thoughts on the fish/crab analysis to be done.

Thanks,

Gary Miller

Just checking up on Gulfco.

Thanks!
